Reason for Change

Errata item WDOG_E201: If the device enters EM2, while the clear command is still being synchronized, the watchdog counter may not be cleared as expected. If the watchdog counter is not cleared as expected, the device can encounter a watchdog reset. Workaround: Wait for WDOG_SYNCBUSY_CMD to clear before entering EM2. Note that WDOG can be clocked from one of the low-frequency clock sources and will require additional time to enter EM2 when implementing this workaround. There is currently no resolution for this issue.

Other added errata whose details can be found in the new errata version are:
